## PROFILE

Web developer dedicated to the creation and maintenance of progressive web sites and applications. Provides engaging user experiences utilizing model view controller and content management systems. Proficient in integrating back-end services and database connections into user friendly applications on any digital platform. Enjoys working collaboratively with peers in team-oriented environments and end users to provide optimal solutions.

## COURSES

Mobile Web Specialist Nanodegree, Udacity

April 2018 – October 2018

Full Stack Web and Multiplatform Mobile App Development, Hong Kong University of Science and Technology on Coursera

November 2017 – February 2018

## EMPLOYMENT HISTORY

Service Technician at Audi North Atlanta, Roswell, GA

March 2010 – October 2016

My responsibilities included troubleshooting advanced electrical and computer issues, performing corrections, fully documenting all work completed as well as providing feedback to manufacturer documentation and procedures. I exercised clear communication among various knowledge levels such as with customers, coworkers and manufacturer representatives during diagnosis and repairs. As a member of a brand dedicated to "Progress Through Technology" I succeeded in delivering superior service to my customers and generated great value to my team.

Achieved Master Guild certification (highest attainable level) • Advanced Diagnostics Technician certification • Documentation of all diagnostics and repairs for customer and manufacturer review • 25+ official certifications and 40+ self-learning courses

Service Technician at Bentley Atlanta, Alpharetta, GA

August 2009 – March 2010

I performed complete service for a brand that expects perfection. I employed a keen eye for detail to exceed my customer's expectations.

Service Technician at Gossett Volkswagen, Alpharetta, GA

June 2003 – March 2010

I performed complete service for the entire range of Volkswagen products including diagnosis, repair, and maintenance.

## AWARDS

Audi Twin Cup Challenge

Nationally placed 11th in 2014 and 16th in 2012 in Audi's advanced diagnosis and product knowledge competition
